

Udit Arora

New York, NY
<https://uditarora.com>

uditarora@nyu.edu

EDUCATION

Courant Institute of Mathematical Sciences, New York University

Master of Science in Computer Science

New York, NY

Jan 2020 – Dec 2021

Netaji Subhas Institute of Technology, University of Delhi

Bachelor of Engineering in Computer Engineering; CGPA: 8.04/10.0

Delhi, India

Aug 2012 – May 2016

EXPERIENCE

Product Labs, IIIT Hyderabad

Research Engineer

Hyderabad, India

Jul 2019 - Dec 2019

- Implemented a pipeline for object detection and tracking in thermal images.
- Developed an end-to-end system for crowd-sourced speech data collection and transcription for 22 Indian languages.
- Product engineering and architecture for a badminton player tracking product used by Star Sports and a document querying chatbot used by SBI (India's largest bank) and others.

Laboratory for Computational Social Systems, IIIT Delhi

Research Associate

Delhi, India

Aug 2018 - Jul 2019

- User, content and action level detection of blackmarket-driven collusion for gaining inorganic appraisals on Twitter using different embedding methods.
- Multimodal text summarization for educational content using hierarchical attention.

Microsoft

Software Engineer

Hyderabad, India

Jun 2016 - Jul 2018

- **Excel:** Developed innovative ways of sharing Excel content which is being productionized as a part of Fluid framework. Enabled integration of Excel with a messaging app and filed a patent with the USPTO for the same.
- **Kaizala:** Worked on a time-driven release of Kaizala messaging app's UWP application. Developed the Chat Page and workflows like heterogeneous message views and custom cards.
- **Skype for Business:** Developed the Cloud Call Analytics feature for Skype for Business Server 2019, building a secure pipeline to upload call telemetry data online. Updated the control panel to use OAuth-based authentication.
- **Hackathon:** Winner of the OneWeek 2017 company-wide hackathon in Rajesh Jha's (EVP at Microsoft) executive challenge - developed a utility to scan and analyze receipts in Excel.

PROJECTS

- **Automated Cricket Umpire:** A computer vision project to make umpiring decisions like Wide/No Ball and LBW in the sport of cricket from a single smartphone camera feed using a ball tracking mechanism. ([git.io/cricketbtp](https://github.com/uditarora/cricketbtp))
- **Guidance System for Visually Impaired:** A computer vision project to assist the visually impaired by using contour detection and Haar classifier on a Raspberry Pi to detect zebra crossings and crosswalks. ([goo.gl/adZ4Hf](https://github.com/uditarora/adZ4Hf))
- **OS Algorithm Visualization App:** A desktop/android app for visualizing various operating system algorithms (CPU Scheduling, Page Replacement, etc.) - developed using Kivy framework in Python. ([git.io/osava](https://github.com/uditarora/osava))
- **Chain Reaction Single Player:** A variant of Chain Reaction game for Android with an option to play against AI CPU bots, and integration of Google Play Game Services - 9000+ downloads. ([ncrwebsite-1033.appspot.com](https://www.ncrwebsite-1033.appspot.com))
- **NSIT Percentage Calculator:** A web-based tool to enable NSIT college students to calculate and analyze their overall percentage - used by over 20,000 students from NSIT. (nsitpercentage.appspot.com)

PUBLICATIONS
